

VITA – DANIELLE TRACHTENBERG. CONSULTANT.

Expertise and Experience

I am an experienced trade economist with strong quantitative skills, and a proven track record of providing policy-relevant analysis in real-world settings. I have particular competence in the use of Computable General Equilibrium (CGE) models, as well as statistical and econometric techniques, to analyze concrete problems in trade policy, including economic integration agreements. My professional experience has included four years at the US International Trade Commission, where I worked in particular on the analysis of the U.S.-Korea FTA, the Trans-Pacific Partnership (TPP), and the US-EU Trans-Atlantic Trade and Investment Partnership (TTIP). I also worked on the quantification of the effects of non-tariff barriers to trade.

Professional History

- 2014-2014: *Consultant*, World Bank.
- 2010-2013: *International Economist*, US International Trade Commission.
